NEUROSCIENCE AND BIOBEHAVIORAL REVIEWS

VOLUME 6 1982

SUBJECT INDEX

Acoustic startle, 515
  brain sites
  N,N-dimethyltryptamine
  5-methoxy-N,N-dimethyltryptamine
  spinal sites
Acupuncture, 229
  antinociception
  central nervous system
  drive states
  endorphins
  euphoria
  nociception
  pain
  running and jogging
  sexual activity
  shamanism
  stress
  suggestion
  vegetative functions
Adjunctive behavior
  aggression, intraspecific, 15
  aggression, schedule-induced, 15
  aggression and conditioning, 15
  aggression and drugs, 15
  aversive behavior, 15
  behavioral categories, 329
  conflict, 15
  displacement activities, 15
  habituation, 329
  operant behavior, 329
  operant-respondent distinction, 329
  reinforcement, positive, 15
  respondent behavior, 329
  schedule-induced behavior, 329
  sensitization, 329
  summation, 329
  temporal conditioning, 329
  unconditioned behavior, 329
Aggression, 125
  agonistic behavior
  defensiveness
  hyperreactivity
  lesions, amygdala
  lesions, hypothalamic
  lesions, olfactory
  lesions, raphe nuclei
  lesions, septal
  muricide
  predation
  serotonin
  social dominance
Aggression, intraspecific, 15
  adjunctive behavior
  aggression, schedule-induced
  aggression and conditioning
  aggression and drugs
  aversive behavior
  conflict
  displacement activities
  reinforcement, positive
Aggression, schedule-induced, 15
  adjunctive behavior
  aggression, intraspecific
  aggression and conditioning
  aggression and drugs
  aversive behavior
  conflict
  displacement activities
  reinforcement, positive
Aggression and conditioning, 15
  adjunctive behavior
  aggression, intraspecific
  aggression, schedule-induced
  aggression and drugs
  aversive behavior
  conflict
  displacement activities
  reinforcement, positive
Aggression and drugs, 15
  adjunctive behavior
  aggression, intraspecific
  aggression, schedule-induced
  aggression and conditioning
  aversive behavior
  conflict
  displacement activities
  reinforcement, positive
Aging and endocrine function, 39
  body weight
  central nervous system
  eating
  estradiol

estrous behavior
hypothalamo-pituitary axis
Agonistic behavior, 125
aggression
defensiveness
hyperreactivity
lesions, amygdala
lesions, hypothalamic
lesions, olfactory
lesions, raphe nuclei
lesions, septal
muricide
predation
serotonin
social dominance
Alcoholic patients, 351
amnesia
Korsakoff syndrome
mammals
man
memory
Papez circuit
thalamic mediodorsal nucleus
Wernicke's encephalopathy
α-Alkyltryptamines, 489
β-carbolines
discriminative stimulus properties
hallucinogens
indolealkylamines
LSD
phenalkylamines
phenethylamines
phenylisopropylamines
serotonin
tryptamine derivatives
Amnesia, 351
alcoholic patients
Korsakoff syndrome
mammals
man
memory
Papez circuit
thalamic mediodorsal nucleus
Wernicke's encephalopathy
cAMP, 297
attention
β-endorphin
learning
melatonin
memory
MIF-1
α-MSH
MSH/ACTH$_{4-10}$
pineal-hypothalamo-pituitary complex
Amygdala, 381
cingulate cortex
entorhinal cortex
gastric pathology
hippocampus
pain
restraint
stress
telencephalic limbic system
Aneural cells, 183
behavior
ciliates
habituation
learning
long-term memory
phylogeny
protozoa
sensitization
short-term memory
Animal communication, 87
birds
categorization
primates
species-specific perceptualization
vocalization
Antinociception, 229
acupuncture
central nervous system
drive states
endorphins
euphoria
nociception
pain
running and jogging
sexual activity
shamanism
stress
suggestion
vegetative functions
Apparatus, 409
computerized image processing system
Arginine vasopressin, 215
fever
homeostasis
infection
Attention, 297
cAMP
β-endorphin
learning
melatonin
memory
MIF-1
α-MSH
MSH/ACTH$_{4-10}$
pineal-hypothalamo-pituitary complex
Aversive behavior, 15
adjunctive behavior
aggression, intraspecific
aggression, schedule-induced
aggression and conditioning
aggression and drugs
conflict
displacement activities
reinforcement, positive

Barbiturates, 311
behavioral milestones
brain damage
learning
prenatal exposure
sex differences
steroid hormones metabolism
teratology
Behavior
aneural cells, 183
biogenic amines, 55
brain sparing effect, 55
ciliates, 183
developmental protein malnutrition, 55
habituation, 183
infantile marasmus, 55
lactation deficits, 55
learning, 183
long-term memory, 183
malnutrition, 55
malnutrition, peripheral indicators, 55
malnutrition and pregnancy, 55
phylogeny, 183
protozoa, 183
rehabilitation after malnutrition, 55
retardation, brain growth, 55
retardation, somatic growth, 55
sensitization, 183
short-term memory, 183

Behavioral categories, 329
adjunctive behavior
habituation
operant behavior
operant-respondent distinction
respondent behavior
schedule-induced behavior
sensitization
summation
temporal conditioning
unconditioned behavior
Behavioral milestones, 311
barbituates
brain damage
learning
prenatal exposure
sex differences
steroid hormones metabolism
teratology
Bibliography, 439
clinical studies
endorphins
fetal effects
heroin
laboratory studies
maternal effects
methadone
morphine
neonatal effects
opiate receptors
opiates
Biobehavioral categories, 95
evolution
fitness
natural selection
sociobiology
Biogenic amines, 55
behavior
brain sparing effect
developmental protein malnutrition
infantile marasmus
lactation deficits
malnutrition, peripheral indicators
malnutrition and pregnancy
rehabiliation after malnutrition
retardation, brain growth
retardation, somatic growth
Birds, 87
animal communication
categorization
primates
species-specific perceptualization
vocalization
Body weight, 39
aging and endocrine function
central nervous system
eating
estradiol
estrous behavior
hypothalamo-pituitary axis
Brain
amygdala, 125
anterior cingulate gyrus, 381
anterior olfactory nucleus, 125
central nervous system, 39
centromedial amygdala, 381
cerebellar vermal cortex, 47
cortex, 381
dorsal diencephalon, 1
dorsal lateral geniculate nucleus, 503
dorsal raphe nucleus, 509
fasciculus retroflexus, 1
forebrain, 515
frontal cortex, 499
habenula, 1
hippocampus, 381
hypothalamo-pituitary axis, 39
hypothalamus, 125
limbic forebrain, 1
limbic midbrain, 1
locus coeruleus, 47
nucleus accumbens, 125
nucleus reticularis pontis caudalis, 515
olfactory bulbs, 125
Papez circuit, 351
pineal-hypothalamo-pituitary complex, 297
raphe, 125, 483
retinohypothalamic tract, 391
septal region, 125
spinal cord, 515
stria medullaris, 1
suprachiasmatic nucleus, 391
telencephalic limbic system, 381
thalamic mediodorsal nucleus, 351
ventromedial hypothalamus, 205
visual cortex, 503
Brain damage, 311
barbituates
behavioral milestones
learning
prenatal exposure
sex differences
steroid hormones metabolism
teratology
Brain sites, 515
acoustic startle
N,N-dimethyltryptamine
5-methoxy-N,N-dimethyltryptamine
spinal sites
Brain sparing effect, 55
behavior
biogenic amines
developmental protein malnutrition
infantile marasmus
lactation deficits
malnutrition
malnutrition, peripheral indicators
malnutrition and pregnancy
rehabilitation after malnutrition
retardation, brain growth
retardation, somatic growth

β-Carbolines, 489
α-alkyltryptamines
discriminative stimulus properties
hallucinogens
indolealkylamines
LSD
phenalkylamines
phenethylamines
phenylisopropylamines
serotonin
tryptamine derivatives
Catecholamines, 421
insomnia
serotonin
sleep latency
L-tryptophan
tryptophan analogues
Categorization
animal communication, 87
birds, 87
concept formation, 105
generalization, 105
pigeons, 105
primates, 87
species-specific perceptualization, 87
stimulus control, 105
vocalization, 87

Central nervous system
acupuncture, 229
aging and endocrine function, 39
antinociception, 229
body weight, 39
drive states, 229
eating, 39
endorphins, 229
estradiol, 39
estrous behavior, 39
euphoria, 229
heterogeneity, 499
hypothalamo-pituitary axis, 39
ligand-binding technique, 499
nociception, 229
pain, 229
running and jogging, 229
serotonin receptors, 499
sexual activity, 229
shamanism, 229
stress, 229
suggestion, 229
vegetative functions, 229
Cerebellar pathology, 47
limbic system
schizophrenia
Cholecystokinin, 145
eating
gastrointestinal tract
hunger
osmoreceptors
satiety
Ciliates, 183
aneural cells
behavior
habituation
learning
long-term memory
phylogeny
protozoa
sensitization
short-term memory
Cingulate cortex, 381
amygdala
entorhinal cortex
gastric pathology
hippocampus
pain
restraint
stress
telencephalic limbic system
Circadian rhythms, 391
constant bright illumination
desynchronization
persistent estrus
reproductive dysfunction
retinohypothalamic tract
sexual receptivity, female rat
suprachiasmatic nucleus
Clinical studies, 439
bibliography
endorphins
fetal effects
heroin
laboratory studies
maternal effects
methadone
morphine
neonatal effects
opiate receptors
opiates
Computerized image processing system, 409
2-DG autoradiography
Concept formation, 105
categorization
generalization
pigeons
